

Louisiana Local Parish Taxing Authorities Tax Account Number Registration Application

Changes are coming to the Local Parish Taxing Authority Account Number Registration Process in Parish eFile! The current application process is being redesigned to provide more efficiency and a more positive experience when applying for account numbers with the Local authorities!

A few highlights include,

- a new user interface with a more user-friendly flow from page to page,
- more detailed explanations along the way, including “tips” that are available when hovering over specific fields,
- the ability to apply for not only the Local authority where a business is located, but also any parish that business delivers into, all within the same application,
- pop-ups at the bottom of the pages if required fields were not completed,
- expandable fields,
- the ability to name each **physical** location of your business entity (*create a nickname to easily identify each business location,*)
- the issuance of a “Master Location Number” to house the State and all Local account numbers, relative to that location,
- and the ability to upload documentation with the application, e.g., articles of incorporation.

To begin the application process, please visit [Parish E-File](#)

Be on the lookout!! Change is coming!!
